

Diagram of Terre Haute's Wastewater Treatment Facility

1 – grit chamber

2 – primary clarifiers

3 – aeration basin of activated sludge process

4 – secondary clarifiers of activated sludge process (sludge recycled to aeration basin and wasted to anaerobic sludge digester)

5 – chlorine contact tank

6 – anaerobic sludge digester

7 – outfall (discharge to Wabash River)

Note: They are currently in the process of converting the anaerobic sludge digesters to aerobic
