

# Report a Polluter!

## Storm Water Pollution Prevention Program

REPORTING FORM FOR ILLEGAL DUMPING AND ILLICIT DISCHARGES DEPOSITED INTO STORM  
WATER DRAINS, STREAMS, RIVERS OR OTHER BODIES OF WATER

The City of Terre Haute and Vigo County would like to incorporate the help of its citizens in preventing illegal dumping and illicit discharges from being deposited into our storm drainage system. Illicit discharges are generally any discharge that is not composed entirely of clean, pollutant-free water into a storm drain, stream, river, or other body of water. Illicit discharges can be in the form of fertilizers, pesticides, sediment, vehicle fluids (motor oil, gasoline and antifreeze), paints, solvents, soaps and detergents, trash, grease, sewage, and pet waste. Illicit discharges are a problem because, unlike wastewater that flows to a wastewater treatment plant, storm water generally flows from the storm drains to the waterways without any additional treatment. These pollutants can significantly degrade the water quality of our rivers and streams and threaten aquatic species, wildlife, and human health.

Thank you for taking the time to help our community prevent and eliminate storm water pollution problems. We will investigate all incidences of storm water pollution that are brought to our attention. Public input is an important component of our program.

**Please provide a description of the discharge:**

**What was the date and approximate time of day when the discharge was observed?**

**Please provide the address or location of the discharge:**

**Use the space below to provide additional details (the identity of the polluter, has this happened before, etc.)**

**Contact Information (Optional):**

Your Name:

Address:

Phone:

**Thank you for Protecting our Rivers and Streams!**

Please hand deliver, fax or mail this form to the following address:

Terre Haute Wastewater Treatment Plant  
3200 South State Road 63  
Terre Haute, IN 47802
